

Rambus Completes Acquisition of Northwest Logic, Extending Leadership in Interface IP

Customer Q&A

What was announced today?

Today, Rambus announced it has closed the acquisition of Northwest Logic, a market leader in digital controllers including solutions for HBM2, GDDR6, DDR4, PCIe and MIPI. Northwest Logic's high-performance, high-quality and silicon-proven digital IP cores are optimized for use in ASICs and FPGAs.

What was included in the acquisition?

As part of the deal, Rambus will acquire Northwest Logic, its technology, product portfolio, staff and customer relationships to offer complete interface IP Solutions (PHY + controller) for advanced applications in data center, networking, AI, ML and automotive markets.

How will customers be affected by this acquisition?

Northwest Logic is dedicated to customer success and will continue to deliver on commitments to our customers.

How will this benefit Northwest Logic customers and the market?

These interface IP solutions from two renowned industry leaders offer a one-stop-shop for designers of SoCs. It simplifies customer engagement by creating a one-stop-shop for IP selection, speeding development and easing integration efforts.
